Numbers - Notepad

File Edit Format View Help

```
import java.util.Scanner;
class Numbers{
public static void main(String args[]){
int a,i;
Scanner n= new Scanner(System.in);
System.out.println("enter the number N until which number to be printed");
a=n.nextInt();
System.out.println("the numbers are ");
for(i=0;i<=a;i++)
System.out.println (i);

}
}
```

3) Number from 0 to 'n'

```
import java.util.Scanner;
```

```
class Numbers {
```

```
    public static void main (String args[]) {
```

```
        int a, i;
```

```
        Scanner n = new Scanner (System.in);
```

```
        System.out.println("enter the number N until which number  
                           to be printed");
```

```
        a = n.nextInt();
```

```
        System.out.println("the numbers are");
```

```
        for (i=0; i <= a; i++)
```

```
            System.out.println(i);
```

```
        }
```

```
    }
```
